Oil and Gas Solutions

Your Future. Our Vision.

Your Future. Our Vision.

The SAP Oil and Gas Experts in the Middle East

Local Knowledge, International Expertise.

Axos Origin Middle East is a leading Middle Eastern Tower 2 company and a regional provider of business consulting and technology integration services. We deliver high quality IT services and solutions that are positive enablers for the success and growth of our clients' businesses and give them a significant competitive advantage.

Axos Origin Middle East provides consistently sound business vision and integrated solutions to a large regional base of national and international clients in the Oil and Gas industry of various sizes across the full lifecycle "Design, Build and Operate" approach. Axos Origin Middle East is primarily strong in system integration and consulting and is able to help clients through the increasing complex challenge of managing the information technology infrastructure and exploring the operational processes.

Supporting the Oil Industry in the Middle East

AXOS is committed to supporting the Oil Industry in the Middle East and the evolution of Digital Oilfield Technologies. We have helped our clients achieve cost improvements in efficiency, reliability and functionality via our innovative solutions and industry knowledge.

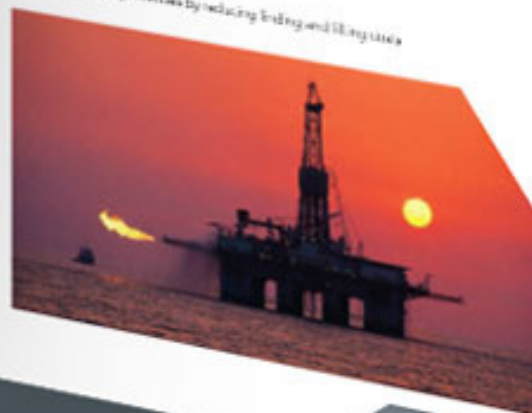

Maximizing exploration and production efficiency from existing oil and natural gas reserves has become a crucial matter throughout the industry, with major operators undeterred by rising oil prices. The next generation will be driven by the need to better monitor and optimize reservoir production, from reinvigorating mature fields to exploring increasingly difficult environments. The implications for revolutionizing the way the industry operates are enormous.

Companies with the leading edge will be those who can most efficiently and effectively use their investments in digital capabilities to gather and distill the right information to the right people in the right place, at the right time and in the right format, enabling effective decision-making at all levels of the organization.

Axos Origin Middle East has worked with many of the prominent hydrocarbon companies in the region. This led, for example, to the creation of the production of commercial systems and services, with specific emphasis on the production of SAP enterprise resource planning solutions.

Axos Origin Middle East understands key business challenges facing the oil and gas industry in the region today:

- Managing relationships with governments and key stakeholders
- Ensuring responsibility to protect health and safety
- Managing environmental impacts
- Managing the balance sheet for oil and gas reserves
- Physical and information assets
- Maximizing revenues by reducing finding and drilling costs

Your Future. Our Vision.

The Atos Origin Middle East Success Story

Through the application of world-class consulting, systems integration and managed operations, Atos Origin Middle East can boast major success stories in the oil and gas industry.

Atos Origin Middle East has worked with many of the pre-eminent hydrocarbon companies in the region. Thus far, this involvement has centered on the provision of commercial systems and services, with specific emphasis on the implementation of SAP/RO enterprise solutions.

We have implemented SAP for:

- Saudi Aramco SAP Project – one of the largest SAP implementations in the world, covering 23,000 users in 200 locations, more than 60 plants and a variety of other sites
- Saudi Aramco Drilling and Producing project – to implement functionality for drilling material forecasting, rig supply and drilling equipment tracking
- SAMREF Oil Refinery – Wall to wall ERP Solution
- Khafji Joint Operations – Implemented MySap Oil and Gas software for the Saudi Kuwait joint venture site
- SASREF Oil refinery – Wall to wall ERP Solution
- Equate Petrochemicals, Kuwait – Asset Maintenance and Finance processes for their ERP Solution
